

*"The On-Demand Delivery System has provided us the means to become more organized while keeping our sales staff well informed about their shipments in a matter of seconds. Finally, an affordable, yet reliable service that is truly designed for the Lumber Industry. I have to admit, I was a little hesitant at first, because I was concerned about some of my staff not being computer literate. However, the system, training, and implementation was surprisingly easy. After just one week, we were off on our own.*

*As an owner, I can now set benchmarks and look at my drivers and pullers efficiency. Using the Electronic shipment log has made our manual logs a thing of the past. We are able to communicate more effectively from our design center, delivery area and the main office.*

*I decided to use this system for all the benefits and their knowledge of how we operate as a lumber yard. With the 30 day money back guarantee, I had nothing to lose. Believe me, anyone who starts using this system will start seeing the benefits the moment they start using it.*

*I recommend this system to all lumber yards that have been looking for a system that is user friendly, cost effective and is LUMBER YARD experienced."*
