## REPORTS

(We can CUSTOMIZE and develop any report to specification within our system)

- ⊕ *Any information in the system can be extracted into a report giving you the ability to manage the operations department from anywhere.*
- ⊕ *All reports can be produced in text format and/or in graph form.*

Sample of Reports are listed below.

1. **Detailed Driver Activity** - This gives detailed information of how many shipments and time spent delivering per day, per driver.
2. **Detailed Puller Activity** - This gives detailed information of how many shipments and time spent pulling by each user, per day.
3. **Driver Performance** - This generates the average shipments and average runs per driver.
4. **Puller Performance** - This generates the average shipments per puller and total number of shipments made.
5. **Shipments by Load Type** - This generates the number of shipments and piggy backs per load description.
6. **Exception Reports**
  - Returns
  - Backorders
  - Custom
7. **Average Shipment Value** - Dollar value per shipment, per truck.
8. **Shipment Cost Per Truck** - Shipment transportation cost, per truck.
9. **Capacity** - Number of cubes or weight per shipment, per truck.
  - **Determine shipping efficiency** - Amount of material shipped vs. capacity.
10. **Puller/Driver Downtime** - Reload time for driver and puller per shipment.
11. **Shipment Cost Per Customer/ Job** - Total Cost to produce and deliver shipments to a specific customer for a period of time
  - **Determine True Profitability for Specific Customer and Shipments.**
